A large, leafy tree stands in the center of a vast, rolling green field. The field is a vibrant green, and the background shows rolling hills under a clear sky. The overall scene is peaceful and natural.

Walk the GREEN LINE

Energy consulting
and knowledge sharing for municipalities

WHAT IS GREEN LINE?

Green Line is a European-funded cross-border project in Slovenia and Hungary. It aims to improve the exchange of knowledge and experience for better cross-border cooperation on environmental and energy issues.

The project establishes a professional community of municipalities in the border area to improve their strategic planning through improved collaboration with other towns. In addition, they receive consulting support and get access to energy planning tools such as an on-line energy accounting system for buildings or a 3D map of the Mura-Zala geothermal basin.

BE PART OF GREEN LINE!

Be part of our professional community! Your town will receive benefits such as:

- A professional energy institution will prepare your energy action plan (e.g. SEAP)
- Access and training will be provided to use energy planning software tools
- Save energy and money by improving the energy management of your public buildings with our on-line energy accounting system
- Use our 3-D geothermal basin model to assess your geothermal potential
- Access and share knowledge and experience with likeminded municipalities via personal meetings and on-line communication

The Green Line project provides these services for free.

HOW TO APPLY

Municipalities that wish to join the Green Line project to benefit from its services need to fill out the below application form and send it back to us via e-mail or postal mail. Applications are evaluated within one month of receipt of application. For more information about the selection criteria please visit our website.
